Not fixed by the pipeline
GPU model
H100 and L40S scores differ
by about 1e-4
Tool versions for the CPU steps
host bcftools, htslib, python3
Checksums of resources/
and the recorded scores
Run record in the VCF
image digest and GPU
not yet written
Ranks can move
between GPU types
Fixed by the pipeline
Container image for SCORE_EVO2
pinned by sha256 digest
Evo 2 7B weights
pinned revision, SHA-256 checked
before torch.load
Test case
rebuilt from a fixed seed and
compared with the committed files
Steps
Nextflow caches each task
by its inputs and script
Same score on the
same GPU type
